If the printer prints a normal page, then it shows that the work was successful Note: If the printer prompts "Print Error", please return to the "port" option from the "USB001" started trying to choose

8. Cleaning of printer head

Cleaning of printer

When the printer has the following conditions, you should clean the printer head:

- ① The printer does not print clearly and the thermal paper is Ok. ② The printer Print pages lengthways is not clear
- ③ It's getting too noisy while feeding paper or printing.

Printer head cleaning steps are as follows:

- 1. Power off the printer and open the paper room cover. Remove the
- $2. \ If the \ printer just finished \ printing \ , \ please \ wait for the \ print \ head \ to$
- 3. With a soft cotton cloth dipped in ethanol (please make sure there is no dripping), wipe the thermal printer head gently and remove any
- 4. Wait for the complete evaporation of any ethanol, then place the thermal paper roll back in the printer and close the paper room cover, then print a test page.

- When the printer maintenance must ensure that the power is shut down
- Hands or other metal tools away from the surface of the printer head, do not use tweezers to scratch the surface of the printer head and
- Do not use gasoline, acetone and other organic solvents for printer

9.General Troubleshooting

- 1: Self printing test is ok but printer does not work after driver installation. A: Recheck the installation according to above installation wizard and see
- if we selected the right port or ask service center for advice if needed. 2: Malfunction of paper feeding?

3. Malfunction of the indicator light

- A: Use soft brush to clean the paper sensor and try again or send it to the service center for repair.
- A: Check the cable connecting way / adapter / power cord / switch on or off?
- Or contact the service center for renair
- 4. Messy code printing except Arabic numeral printing A: language switching incorrectly, please use our tool "IPrinter" (you can find it
- on the enclosed CD) to change the language what you want print.
- 5. Red indicator keep flashing during the printing.
- A: Usually it is due to the high temperature of the print head. If printing stopped, please contact the service center for repair.
- 6. Printing speed is very slow for serial printer
- A: follow this path and change the set accordingly : Driver -- Properties -- Device Settings -- Print Mode -- Print as soft font.
- 7. Water or other liquid spills into the printer
- A: Cut off the power, we can dry the main board or printer head with a hair dryer, careful of the temperature (average 50 degree is ok)
- 9 The printer can't work
- A: The battery maybe without electricity, please use power adapter to charge. Then you try to star the printer, if the printer has same problem, please send to service center for repair.
- 10. Can not search the Bluetooth printer
- A: Please check the equipment "Bluetooth" function whether opened, the communication whether normal, then replug the printer "Bluetooth Module" try to connect and search "Bluetooth" again, if the problom are still existed, please send the specified location repair.
